
Healthy Volunteers Needed for MRI Research Study

Researchers at the Providence VA Medical Center are conducting a study comparing MRI brain scans of healthy patients to patients with a seizure disorder and/or head injuries.

Study procedures include:

- Interview with a trained study staff member
- Questionnaires
- Two fMRI brain scans 13 weeks apart

We are looking for:

- Veterans or Civilians
- Ages 18-60 years old
- Do not have seizures
- Have not had a head injury
- Are MRI safe
- Have never been diagnosed with any neurological condition and/or mental health disorder
